

How long would it take an attacker to breach your business?

Your users' credentials are exposed on the **Dark Web**
Millions of stolen data records, including usernames and passwords, are added and sold on the Dark Web every year

63%

of businesses reported the loss of sensitive data in 2019

Compromised credentials used for **phishing & social engineering**
Users often re-use the same password for multiple accounts, making it easy for attackers to conduct business email compromise (BEC)

88%

of companies faced targeted phishing attacks in 2020

Human error is exploited and your business is breached
Criminals prey on unwitting users and human error — such as downloading malicious attachments — as a gateway to corporate data

95%

of successful data breaches come from human error

Get Your Free Human Risk Report (HRR) from iNTALECT Today

Calculate your human cyber risk and boost resilience

Get your free report to learn:
